### Official Practice and Noise Checks

After finishing the model processing in the early morning, we started the official practicing on the contest area including a noise check for everybody. Lowest noise level was reached by Levy Aviv's and Stefano Lucchi's helicopters (@ 77dBA), highest was Krister Thorstensson's (@ 89 dBA).

The judges watched some calibration flights and were satisfied in comparing their nearly equal results. The grandstand in front of the flightpath, which was discussed controversial by some teams, has proved itself as no barricade. The perfect symmetrical dimensions are a help not only for the hovering manoeuvres but also for the aerobatic manoeuvres.

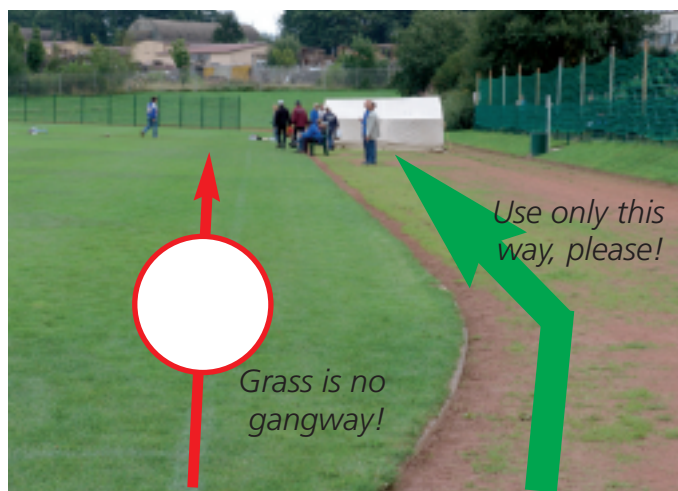

Tomorrow we will start the first round of the preliminary flights. The flight order is showed on page 4 of this newsletter. All team managers are asked to bring the transmitters into the impound between 7:00 and 7:45.

Because of the rain the last days, the grass of the flying field got very slobbery. We all don't

want to run the next days in dirty mud, so please use the cinderpath for reaching the waiting box like showing in the picture.

When you are arriving tomorrow at the airfield, it is allowed to park your car in front of the competition office exclusively for model delivery. After that you have to place your car in front of the entrance (gate). – Thanks for your help and understanding.

We wish you the best luck and always good flights!
